**Botanical Name:** Rhinacanthus beesianus

**Common Name:** Chinese Snake Jasmine

**Origin:** Yunnan Province China

**Height/Width:** 2m tall +

**Habit:** Shrub

**Flower:** Large heads of delicately perfumed white flowers shaped like scalloped shells. Blooming from March or April through the Autumn to early Winter months

**Leaves:** Large egg-shaped leaf with the narrower end at the base, pleated and shiny.

**Climate:** Tropical to temperate

**Soil:** .Grows in most soils.

**Aspect.** Flowers best in full sun but can cope in semi-shade. Grows well where shrubby salvias would grow.

**Prune:** Hard prune mid-August to keep it shapely and feed with general-purpose fertiliser then.

**Drought/Frost:** Tender

**Propagation:** Seeds and cuttings.

**NOTE:**

- Hard to find plant: I found commentary about this plant at Dicksonia Rare Plants' Facebook page so I assume that one could purchase it by contacting them.
